

NOVELSAT Supports Internet Connectivity Restoration in Disaster-Stricken Tonga

NOVELSAT satellite modems deliver high capacity to restore broadband connectivity following volcanic eruption and tsunami disaster

Ra'anana, Israel – February 07, 2022 – [NOVELSAT](#), a global leader in content connectivity, announced today that it is supporting local efforts to restore communications services following the Hunga Tonga- Ha'apai volcanic eruption and subsequent tsunami that knocked out communications infrastructure in the Tonga islands.

NOVELSAT satellite modems deliver high-throughput connectivity, restoring vital communications services and facilitating critical business and operational activities.

“We are proud to be of help to the people of Tonga during this challenging situation,” said Aviv Ronai, Chief Product and Marketing Officer at NOVELSAT. “When disasters strike and existing infrastructure is damaged, high-capacity satellite connectivity is of primary importance. Restoring communications services in the aftermath of crisis events, our highly resilient and quick-to-deploy solutions provide fast and reliable broadband connectivity for the most demanding services.”

About NOVELSAT

NOVELSAT is a leading provider of next-generation content connectivity solutions. Powered by innovative technologies, our broadcast and broadband solutions are transforming networks' capabilities to expand growth potential and to drive new experiences on any device, anytime, anywhere. Our high-performance products for satellite and terrestrial content connectivity include integrated video solutions and highly efficient broadband connectivity solutions, as well as best-in-industry content security solutions. Transforming delivery of data and video with new levels of performance, efficiency, agility, and security, NOVELSAT empowers mission-critical and demanding applications for the mobile, media, entertainment, government, and mobility markets.
