

## Intelsat Selects NOVELSAT to Power High-Performance Networks

### NOVELSAT satellite modems enable high-speed trunking and backhaul connectivity for Intelsat's AgileCore UX offering

Ra'anana, Israel – March 14, 2023 – [NOVELSAT](#), a global leader in content connectivity, announced today that [Intelsat](#), operator of one of the world's largest integrated satellite and terrestrial networks, has selected NOVELSAT's satellite connectivity technology for high-performance networks. Intelsat will utilize NOVELSAT's satellite modems to supply high-speed trunking and backhaul connectivity for wireless and wireline networks.

This collaboration allows Intelsat to further strengthen its AgileCore UX offering, a performance-optimized trunking solution that integrates high performance and reliability with managed wireless WAN optimization. By utilizing NOVELSAT's high-speed satellite technology, Intelsat can enhance the performance and capabilities of their network, to meet the ever-increasing demands of their customers.

NOVELSAT satellite modem technology boasts advanced capabilities, including NOVELSAT DUET™ bandwidth reuse technology and NOVELSAT NS4™ bandwidth-efficient waveform, which deliver unparalleled transmission speeds and maximum spectral efficiency. NOVELSAT modems are also equipped with powerful networking capabilities, high interference resiliency, and a comprehensive management system, ensuring maximum performance and reliability for high-value communication applications.

"We are thrilled to be partnering with Intelsat to power their high-performance networks with our cutting-edge satellite technology," said Gary Drutin, CEO of NOVELSAT. "Our satellite modems are designed to deliver the most capable and reliable network connectivity, making them the perfect fit for Intelsat's mission-critical networks."

"Intelsat is constantly innovating so we can deliver the solutions that meet the growing expectations of our customers," said Al Soto, Senior Principal Product Manager, Networks, at Intelsat. "NOVELSAT's cutting-edge technology will be a valuable addition to our network and will allow us to further enhance our services and provide customers with the reliable, high-speed connectivity they need".

**About NOVELSAT**

NOVELSAT is a leading provider of next-generation content connectivity solutions. Powered by innovative technologies, our broadcast and broadband solutions are transforming networks' capabilities to expand growth potential and to drive new experiences on any device, anytime, anywhere. Our high-performance products for satellite and terrestrial content connectivity include integrated video solutions and highly efficient broadband connectivity solutions, as well as best-in-industry content security solutions. Transforming delivery of data and video with new levels of performance, efficiency, agility, and security, NOVELSAT empowers mission-critical and demanding applications for the mobile, media, entertainment, government, and mobility markets.
