

NOVELSAT Selected for a Major Government Project in Australia

NOVELSAT satellite connectivity empowers nationwide network to improve government services across Australia

Ra'anana, Israel – June 8, 2023 – [NOVELSAT](#), a global leader in content connectivity, announced today that it has been chosen to advance broadband connectivity for a prominent government project in Australia. By leveraging high-performance satellite connectivity, operating in a star architecture, NOVELSAT will enable faster and more secure communication across multiple locations throughout the country.

With the rapid growth of data traffic and the increasing demand for more reliable communication, NOVELSAT solution addresses the need for a robust and scalable communication network. NOVELSAT's advanced satellite modem technology will provide seamless connectivity to government systems across Australia, ensuring real-time data transmission. This deployment will enable enhanced services to support mission-critical processes.

NOVELSAT satellite modem technology offers industry-leading performance, combining NOVELSAT NS4™ bandwidth-efficient waveform and NOVELSAT DUET™ bandwidth reuse technology to deliver unparalleled transmission speeds and highest spectral efficiency, as well as exceptional resilience. NOVELSAT modems are also equipped with powerful networking capabilities, high interference resiliency, and a comprehensive management system, ensuring maximum performance and reliability for high-value communication applications.

"We are proud to be chosen for this significant government project in Australia," said Aviv Ronai, Chief Product and Marketing Officer at NOVELSAT. "Our advanced satellite modem solutions are designed to meet the stringent requirements of mission-critical services and will provide the government with a reliable and high-performance communication network that meets their increasing demands."

About NOVELSAT

NOVELSAT is a leading provider of next-generation content connectivity solutions. Powered by innovative technologies, our broadcast and broadband solutions are transforming networks' capabilities to expand growth potential and to drive new experiences on any device, anytime, anywhere. Our high-performance products for satellite and terrestrial content connectivity include integrated video solutions and highly efficient broadband connectivity solutions, as well as best-in-industry content security solutions. Transforming delivery of data and video with new levels of performance, efficiency, agility, and security, NOVELSAT empowers mission-critical and demanding applications for the mobile, media, entertainment, government, and mobility markets.
